## KNOW YOUR SALT FROM YOUR GRIT?

**WHITE DEICING SALT** | Very clean to use and leaves no dirty residue to be trodden into buildings and vehicles. It has equal particle sizes for constant de-icing quality. Dry and free flowing, the best for use in spreaders.

**BROWN ROCK SALT** | Leaves a gritty residue which provides extra grip for vehicles or pedestrians after de-icing. Mixed granule size makes it less effective when used with spreaders, however as a cheaper alternative to white salt, it is perfect for use in large areas such as car parks or roads.

### White De-Icing Salt

White De-icing Salt in 25kg Bags  
(Minimum order 7 bags)

This salt is clean to use leaving no dirty residue to be trodden into buildings and vehicles. After a winter season there is nothing to sweep up and no drains to be cleared.

This white salt is carefully screened to produce the most effective spread pattern, increasing pedestrian safety and the working life of your equipment.

No. BAGS	BAG SIZE	CSI PRICE
7	25kg	£155.93
14	25kg	£203.18
21	25kg	£255.15
28	25kg	£266.49

### Brown Rock Salt

Brown Rock Salt in 25kg Bags  
(Minimum order 20 bags)

Brown rock salt is unrefined and a cheaper alternative to white salt. The ideal choice for cost effective gritting of gritting large areas such as roads, car parks, large areas of pavement and walkways.

Our brown rock salt is supplied in 25kg bags, available in the quantities below.
